Neo PAP[®]

Infant Nasal CPAP Kit

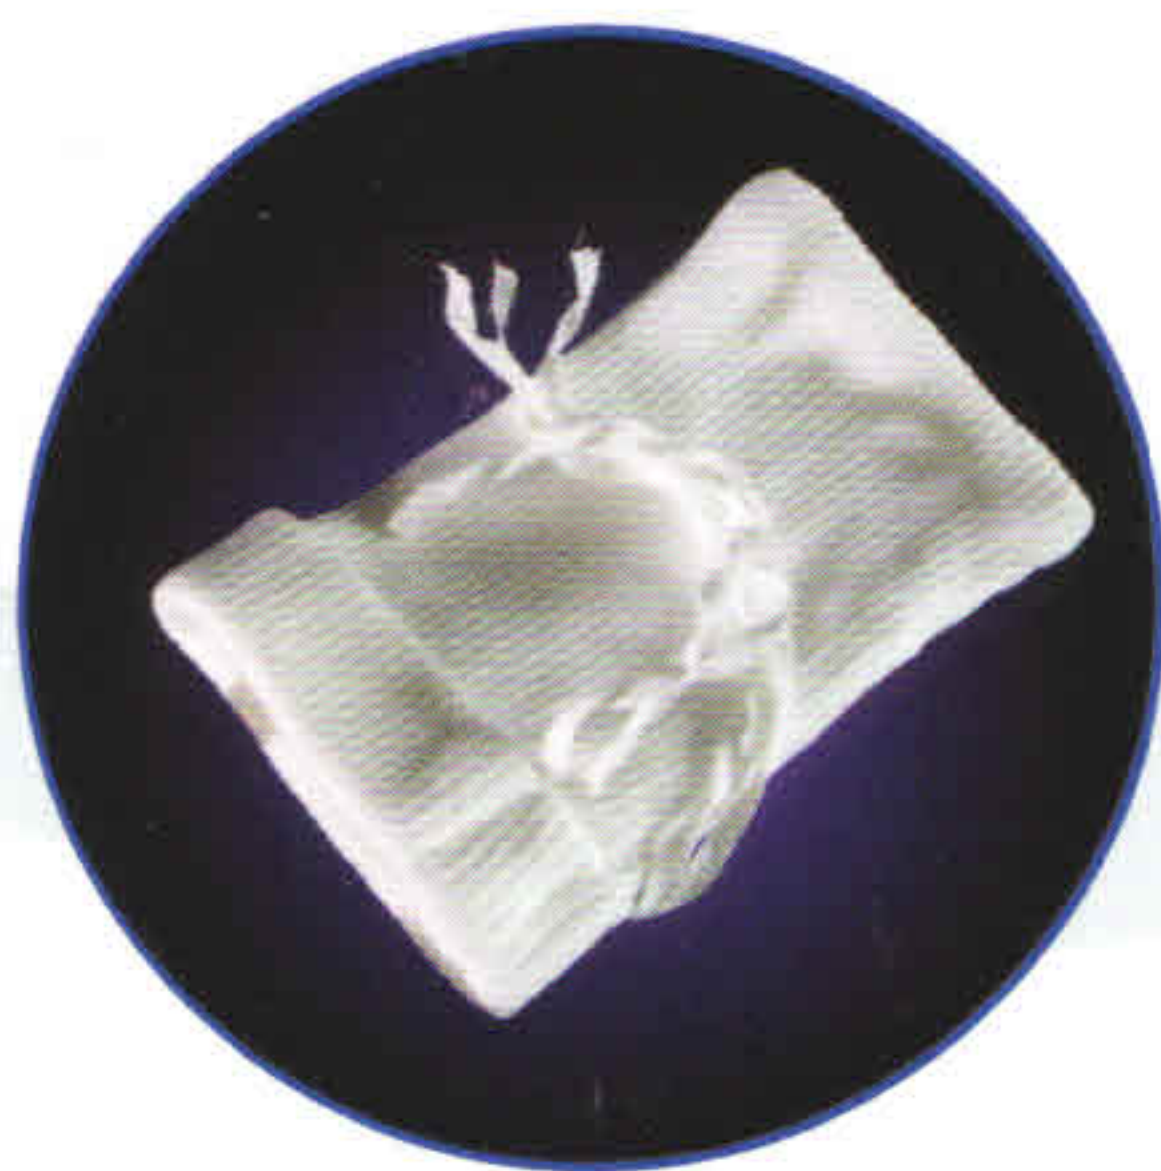

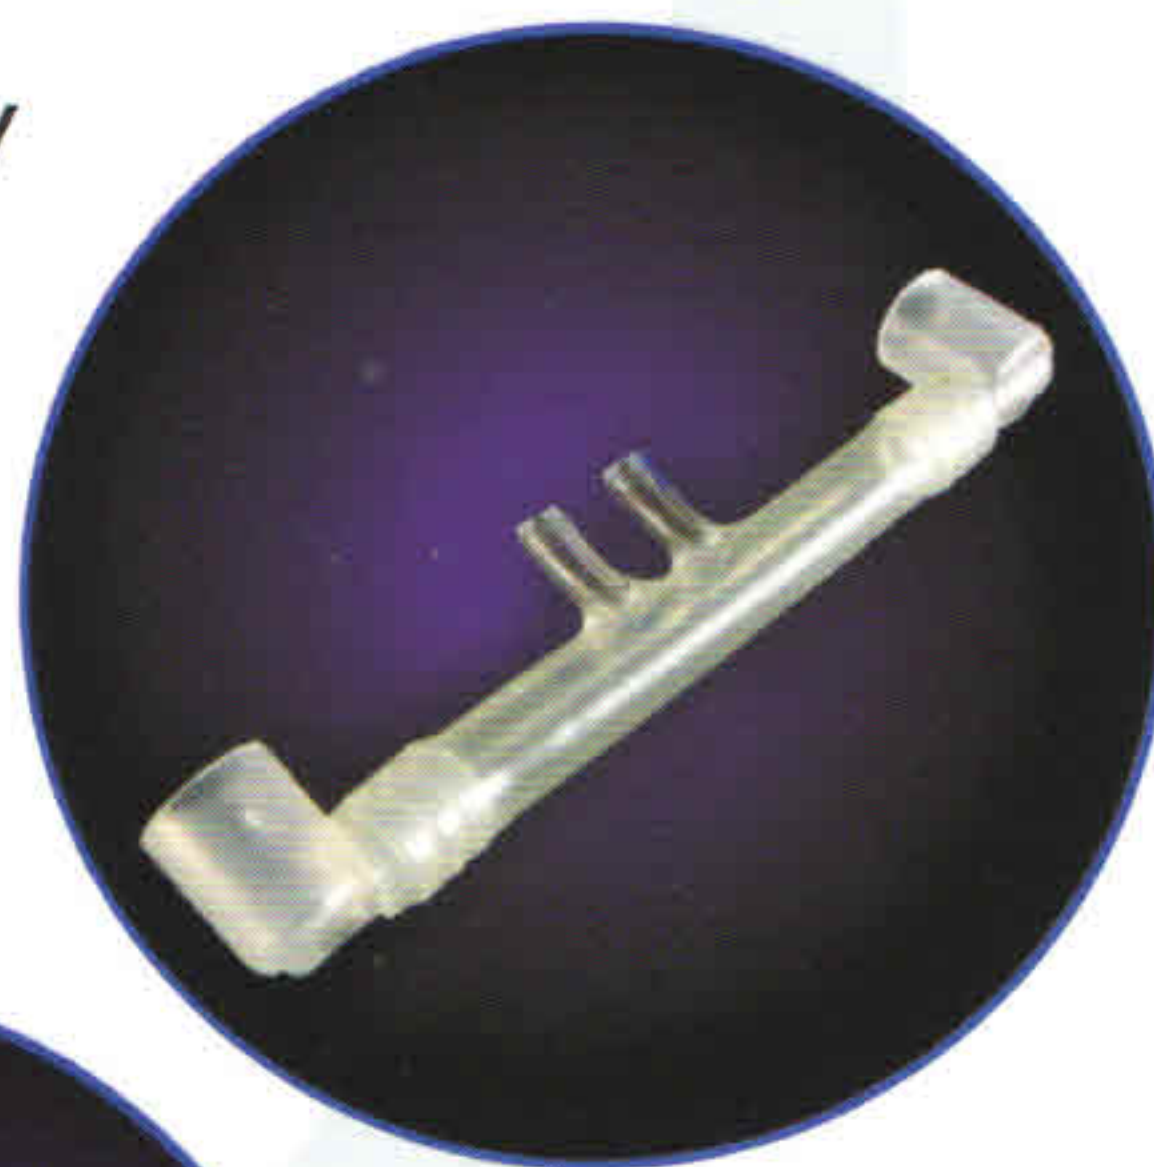

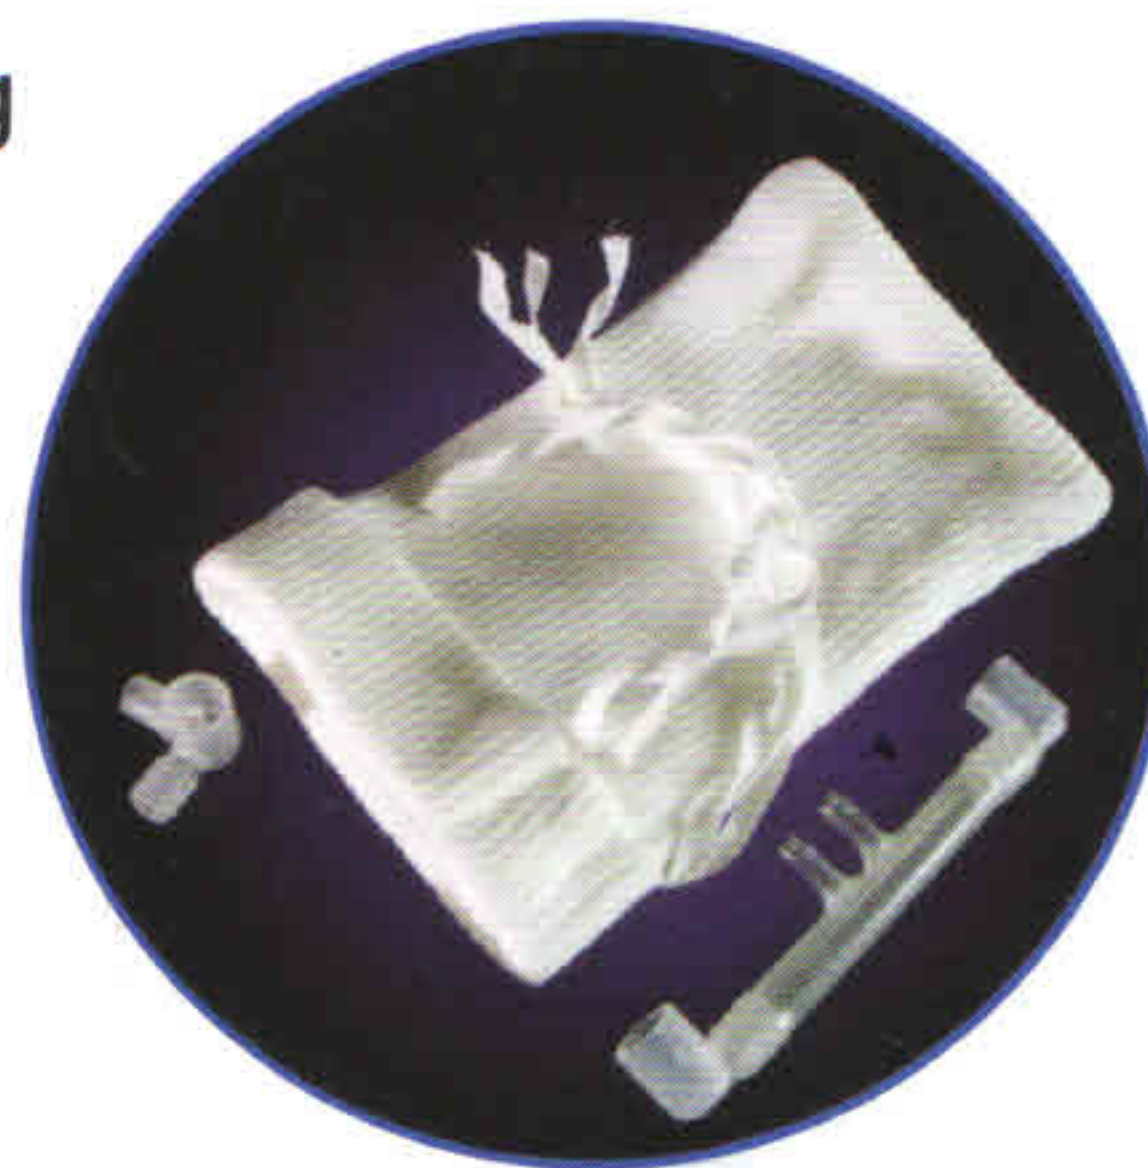

Designed to reduce the trauma associated with delivery of Infant Nasal CPAP

Neo PAP[®] Infant Nasal CPAP Kit

The NeoPAP[®] Infant Nasal CPAP system is at the cutting edge of neonatal care. It is a clinically proven gentle and non invasive method of providing respiratory support for the pre-term infant.

Being completely non-invasive it does away with the trauma associated with the delivery of Infant nasal CPAP.

The NeoPAP[®] Infant Nasal CPAP Kit is a highly versatile system which can be used on all existing ventilators in the NICU & contains all the components required to create a stable CPAP.

At a Glance

- Extremely Soft and anatomically contoured CPAP prongs enhance fit and comfort.
- Optional Pressure port for monitoring of proximal airway pressure.
- Adjustable right angle connectors facilitate positioning of tubing.
- Complete with bonnet for securing patient circuit.
