

Sil-GRIP

Polyurethane Based Silicone Adhesive Tape

Sil-GRIP Multipurpose Silicone Adhesive Tape, is a new generation polyurethane based silicone adhesive tape that is highly permeable and conforming to the skin.

Characteristics:

- Soft and pliable, does not damage and disrupt any skin layers.
- Patent design allows tearing the desired length without compromising on tape strength.
- Excellent adhesive property, waterproof, high skin adhesive power - the corners don't peel off once applied when immersed in water as compared to existing paper blended/non-woven based silicone tapes.
- Higher conforming property due to PU backing as compared to existing tapes.
- Sil-GRIP can be reapplied without losing adhesiveness, no hair removal, no residue.

Application - Thanks to its gentle and non-stripping properties Sil GRIP is the preferred choice for:

- Sensitive skin such as Neonates and Geriatric patients.
- It is Suitable on damaged skin such as Dialysis, Chemotherapy and Radiography patients.
- All types of fixation e.g. IV, Cannula, tubes, electrodes etc.
- Use as skin protection to prevent sores.

Ordering Information

Cat No.	Sizes	Quantity per case
743519	Sil-GRIP – 1.9cm x 1.5m roll	6 rolls
743525	Sil-GRIP – 2.5cm x 1.5m roll	6 rolls
743508	Sil-GRIP – 2.5cm x 5m roll	6 rolls
743509	Sil-GRIP – 5cm x 5m roll	4 rolls
